- Roof Racks (500kg Capacity)

Dealer

# The **CRUZA** is built tough to last

## CRUZA & CRUZA X

The vacuum bonded roof and walls are constructed from 2mm thick fibre glass inner and outer skins, filled with structural foam - This offers greater strength and excellent insulation properties.

The hot dipped galvanized chassis with pressed hole cross members will ensure that your Cruza remains protected from corrosive elements for many years and also offer protection to under floor wiring & plumbing.

With ample storage on the inside and a large exterior front boot you've room to carry all your family will ever need to 'stay in style' while camping.

## 3 GREAT CRUZA layouts available

### Option 1

Body Length	Open Length	Travel Length	Travel Height	Travel Height (Cruza X)
4165mm / 13'8"	6550mm / 21'8"	6010mm / 19'8"	1660mm / 5'6"	2010mm / 6'6" (inc Roof Rack)
